

Managed Care Solutions

Reimbursement Consulting Services

Through the analysis of your pharmacy dispensing data and with the help of your personal reimbursement consultant, you will gain valuable insight into how your pharmacy is performing so that you can improve your reimbursement accuracy, mitigate risk and enhance patient adherence.

Reimbursement Consulting Services (RCS) is designed to help you:

- Quickly understand where you have additional reimbursement opportunities
- Create a financial forecast with visibility into historical reimbursements and DIR fees
- Protect profits by catching potential audit risks before a PBM does
- Grow and efficiently retain your Medicare business
- Increase patient adherence measures by monitoring and identifying patients who need help

Features

- Regular calls from your personal reimbursement consultant so you can quickly identify where you can take action now
- Customizable, user-friendly dashboard to help you prioritize what is most important to your pharmacy
- Summary of your pharmacy performance and a highlight of your Medication Therapy Management (MTM) opportunities
- Tailored reports available based on your pharmacy needs
- Medicare Part D patient analysis and reporting

For more information, contact your sales representative.

"Reimbursement Consulting Services has been a positive source of revenue preservation and business growth for my pharmacies since I first enrolled in 2014. Our RCS advisor has been an invaluable educator and continually helps to quickly identify areas of concern based on our reporting within RCS. With the expansion of the RCS dashboard to include adherence and inventory performance measures, we are comfortable in the knowledge that Cardinal Health continues to look for and implement ways to provide integrated visibility into measures for pharmacy viability and success."
