# FAQ: **ebs** Electronic Billing Services, Inc

## **What is the setup fee?**

There is a \$200 enrollment fee if you want EBS to complete and submit the Medicare Part B application. If you already have a Medicare Part B number, there is a \$75 setup fee. As a Health Mart customer, you will receive a \$75 discount.

## **What services are included?**

EBS will provide education on joining medical networks, provide immunization documentation forms, process and reconcile all claims, work any denials, and monitor outstanding claims. EBS will also provide monthly management reports, electronic claims access and eligibility services at no additional cost.

## **What vaccines are covered by Medicare Part B?**

If you are enrolled as a "Pharmacy," you can bill for flu, pneumonia, Hep B and exposure vaccines. If you are enrolled as a "Mass Immunization" supplier, you are limited to just billing flu and pneumonia vaccines.

## **Can I bill other vaccines that are not covered by Medicare Part B?**

Yes, but you need to be a "Network Provider" with the insurance plans to receive the best benefits. If the payer is an HMO, you **MUST** be in network. If the payer is a PPO, the patient's benefits are generally better (lower deductibles and co-pays) if you are in the payer's network. Do you need assistance with Network credentialing? EBS bills all medical benefit plans and will provide you instructions on how to begin the process of joining the medical networks.

## **Can EBS bill for other services?**

Yes! In addition to immunizations EBS can also assist you with Durable Medical Equipment, Prosthetics, Orthotics & Supplies, Diabetes Self Management Training, Medication Nutrition Therapy, CLIA Waived-Point of Care testing, and clinical services for Pharmacists.

## **If I want to sign up with EBS, how long does it take to get up and running?**

If you already have a Medicare billing number, the transition to EBS should take no more than a week or two. If you have not enrolled with Medicare, EBS can process the paperwork to be retroactively effective 30 days from the date Medicare receives your application. Once your number is established, then EBS can bill all claims for immunizations you have already dispensed.

## **What are the differences between EBS and other billing partners?**

EBS is not just a billing company. We will complete the enrollment process for you, provide unlimited education to your staff and provide unlimited consulting services. They not only bill your claims, but they bill to ALL payers (all medical benefits plans). EBS reconciles all claims, works any denials, keeps an eye on your accounts receivable, and provides assistance in understanding how to join the medical benefit networks. You also will have electronic access to see claims, remits and real-time eligibility. EBS is not just a biller, but your partner in SUCCESS!

## **If I am working with another billing service, can I contract with EBS?**

Yes! If you have a current contract with another claim processing company, EBS can provide consulting. These services are quoted based on your individual needs.
