PHARMACY SOFTWARE FOR  
**PHARMACY SUCCESS**

RXQ

PHARMACY SOFTWARE FOR  
PHARMACY SUCCESS

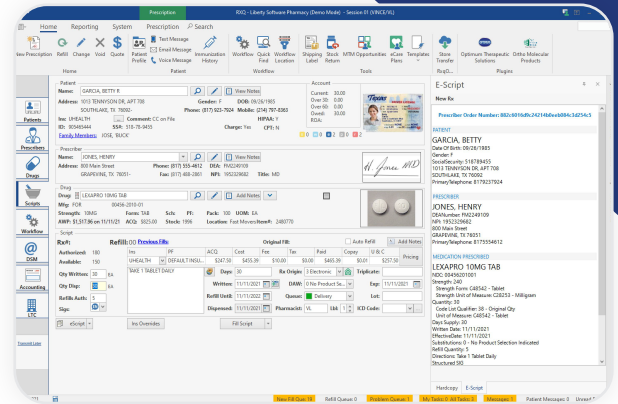

## PHARMACY MANAGEMENT SOFTWARE

Pharmacy software for pharmacy success. How can a software platform drive pharmacy success? It's not just the technology, although it is built on Microsoft's newest technology.

It's not just the feature set, although it is comprehensive. More than anything, we believe that it is the user experience. Prescriptions can be filled quickly and accurately while protecting patient safety. Many pharmacists say it is the easiest system they have ever used.

### How long does it take to teach new employees how to operate your existing pharmacy software?

Pharmacies using Liberty's software have found that new employees can begin filling scripts immediately, with little to no training. It's just that simple. RXQ is a well-designed pharmacy system that can help increase staff productivity. When help is needed, it's only a phone call or a mouse click away.

### Increase Patient Safety

Integrated Drug Facts and Comparisons, Five Star Dashboard, and RPh Checks are just the basic safety features built into the program. RXQ is also a platform for Total Medication Therapy Management and Prescription Drug Monitoring Program integration.

### Improve Profitability

With the most comprehensive reporting and DataView system on the market, RXQ allows you to know what drugs are the most profitable. Audit report produces one report to prepare for insurance audit and payment center allows you to review all insurance payments.

### Enhance Patient Care

Autopilot Filling for incoming prescriptions cuts patient wait times and reduces staff workload. Rx Alerts notifies patients when their prescription is ready. Med Synchronization and Auto Refills ensures refills are ready exactly when they are supposed to be.

“

*I find the system to be very user-friendly, easy-to-use, and easy to train employees.*  
- Judy Harris, Owner and Pharmacist of All-Care Pharmacy

SOFTWARE

# Features

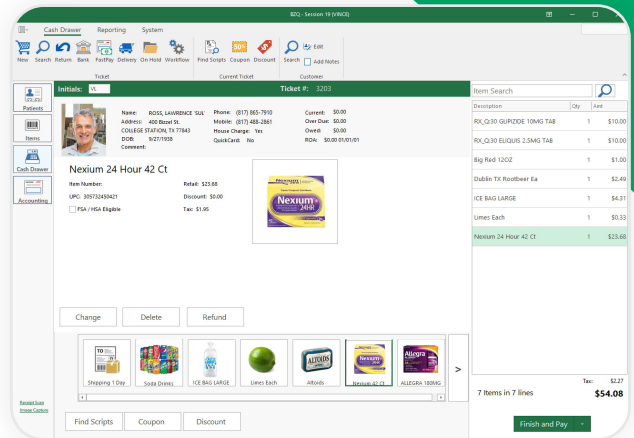

-  **Workflow to Fit Your Pharmacy**  
Liberty's workflow has customizable workflow stages and auto-routing rules to allow you to design your own workflow to fit your pharmacy needs.
-  **Patient Notification Center**  
Connect with your patients and automatically text, email or call patient refill reminders, prescription alerts, prescription waiting messages, and shipment notices.
-  **Five-Star Dashboard**  
Liberty helps you be proactive about your five star rating. Our five-star dashboard is built right into the software and calculates your numbers and helps identify problem patients.
-  **Facts and Comparisons**  
Save time by viewing Integrated Drug Facts and Comparisons while filling prescriptions and during pharmacist verification workflow steps.
-  **Compounding**  
Liberty's compounding tool set with scale integration helps you easily build and bill compounds without purchasing separate programs or modules.
-  **Integrated Shipping**  
Full integrated shipping for major shippers with label printing and auto updated proof of delivery to complete your insurance audits.
-  **Take Charge of Refills**  
Liberty has a number of tools to be proactive with patient refills including auto refills, refill management and MedSync. Plus, patient adherence numbers are displayed graphically for quick reference.
-  **AWP Reclaim**  
Built right into the pharmacy software, Liberty allows you to review and rebill claims that third parties paid using outdated AWP price. Select a few claims or rebill all with the press of a button.
-  **Inventory Control Made Easy**  
Liberty's inventory control puts you back in control with support for multiple vendors, integrated ordering with wholesalers, automatic price update, cycle counting, and store-to-store inventory transfers.
-  **Simple Accounts Receivable**  
Accounts receivable is built-in and easy to understand. Processing is quick and statements can be extensively customized for your pharmacy.
-  **Insurance Audit Report**  
Save hours with Liberty's audit report that helps you quickly prepare for insurance audits. Find prescriptions and print out everything you need for many audits with one report.
-  **Clinical Smart Check**  
Clinical alerts consolidated in one easy-to-use dashboard. Review alerts faster, expedite RPh verifications, and view specific drug interactions.
-  **Immunizations**  
Immunization features includes integrated workflow-to-track and administer immunizations, dose and appointment scheduling, pricing, lot expiration date, templates for fast data entry, and interaction between state registries.
-  **eCare Plans**  
eCare Plan integration helps translate patient data and information to other health care providers such as current medication regimens and health concerns.
-  **Pharmacy Task Management**  
Schedule one time or recurring tasks for yourself and staff. Keep your pharmacy organized and provide better follow-ups to your patients.
-  **Monitor DIR Fees**  
View the impact of DIR fees on your pharmacy with Liberty's DIR fee management feature. View the estimated DIR fees on paid claims and in profit reports.
-  **Extensive Reporting**  
Liberty comes preloaded with helpful and relevant reports. More importantly, easily create reports for your pharmacy's needs with our flexible report designer.
-  **Flexible DataView**  
Liberty's DataView let's you drill down on your data. Sort, group, and filter to quickly find answers to questions about your business.
-  **Manufacture Coupon Management**  
Impress your patients by setting up manufacture coupons ahead of time. Attach coupons to drugs and automatically process them during prescription processing.
-  **Secure Direct Messaging**  
SDM allows pharmacists to electronically message healthcare providers. It combines the convenience of email with the security of full HIPAA compliant communication.
-  **Advanced Bin Management**  
Quickly find the location of any prescription at any location in your pharmacy with Liberty's built-in bin management.

## PHARMACY POINT OF SALE

For a pharmacy, point of sale software needs to be more than cash drawer management for your front-end. For pharmacists, it should help deliver better patient care. For your patients, it should enable your staff to provide better customer service. For store owners, it should result in better accountability, assistance with HIPAA compliance, drive profits, and improve pharmacy efficiency. These are values that not just any point of sale package can deliver. This is not simply an add-on to your pharmacy system, but a fully integrated solution that works hand in hand with our pharmacy management software.

## Features

### Modern Payment Processing

Liberty's point of sale is ready for today's complex payment processing. BZQ enables your pharmacy to accept multiple credit card processors, EMV chip cards, Apple Pay, Google Wallet, and Flex and Health Saving cards.

### Front End Inventory Management

Finally get a handle on your front-end inventory. Manage inventory, place electronic orders with wholesalers, and print shelf barcodes.

### Capture Signatures

Electronically capture signatures for third-party audits, pharmacist counseling, credit cards, and even custom restrictions. Drive-through and delivery signatures can also be captured with ease.

### Pseudoephedrine Real-Time Monitoring

Track over-the-counter sales for pseudoephedrine and restrictions for monthly limits. Real-time monitoring (available in many states) with NPLex eliminates double entry and manual paper logs.

### Patient Facing Display

Liberty's point of sale powers a customer facing display for custom advertising and line items during check out.

### PCI Compliant and IIAS Certified

Security is very important in today's world. Liberty's point of sale is PCI Compliant and also IIAS Certified for Flex and Health Savings payment processing.

*Liberty has an integration point of sale system that works flawlessly with their prescription system.*

- Jim Hrnair, Owner and Pharmacist of Las Colinas Pharmacy

# One

## PHARMACY SOFTWARE FOR PHARMACY SUCCESS

### MULTI-STORE MANAGEMENT

RXQ One is Liberty's web-based solution for multi-store management. A modern pharmacy chain needs access to data in real-time. With RXQ One, stores sync their data continuously to the cloud and you have access to it from anywhere. This offers multi-store managers access to reports and more control over management functions. RXQ One is a new approach that solves the traditional pain points of multi-store management.

### Features

#### One Dashboard, Every Pharmacy

View which stores fill the most scripts and their most profitable drugs. With Dashboard on RXQ One, you can see all of your hourly transactions and know how your business is growing.

#### Store-to-Store Transfer

Easily transfer prescriptions and drug information quickly within your pharmacies.

#### Centralize Accounts Receivable

RXQ One users can track outstanding A/R balances across all their stores. Management has the ability to run and print statements for individual stores or all stores at once.

#### Centralized Reporting

Run reports for any individual store or all stores in real time from your web browser. Reports can be viewed online or saved as PDF or Excel files.

#### Drug and Pricing Management

Easily manage drug files and pricing across your stores with Liberty's centralized drug and pricing tools. In addition to managing existing drugs, new drugs can be added from the main office and pushed down to stores.

#### Front-End Item Management

Manage your stores' over-the-counter items in one place. Have more control over your inventory with the ability to manage which items are in your point-of-sale database from anywhere.

#### Third party Reconciliation

Import 835 forms centrally to insure claims are processed at all your stores. Review past claims to ensure your stores are receiving full reimbursement.

“

*They are open to my needs and they adapt very quickly. They turn on a dime. You know you have a good partner with Liberty.*

- Dennis Song, Owner and Pharmacist of Flower Mound Pharmacy
